

**Build a
Foundation**
of Supply Chain
and Operations
Management
Knowledge

**Introducing the
APICS Principles
of Operations
Management
program**

**Master core
concepts and
foundational skills**

The NEW Principles of Operations Management program is the only educational program that delivers the fundamental knowledge needed in the fast-growing fields of supply chain and operations management.

There are five courses that can be customized to match the training needs of the organization.

- Inventory Management
- Operations Planning
- Manufacturing Management
- Distribution and Logistics
- Managing Operations

The courses are great for gaining the core knowledge before earning an APICS certification.
